

IN THE CLAIMS

1. (Currently amended) A boxer short-type article of lingerie having an inseam comprising a trunk being made of a loose-fitting non-elasticized textile and leg parts being made of a form-fitting textile, wherein said trunk and said leg parts are unitary in construction and are separated by a line passing through an upper part of the inseam.

2. (Previously presented) The article claim 1, wherein said article is a knitted article.

3. (Previously presented) The article of claim 1, wherein said article is a circular knit article.

4. (Previously presented) The article of claim 2, wherein said leg parts is made using a spandex yarn and the same stitch as said trunk part.

5. (Previously presented) The article of claim 1, further comprising a welt and a waistband.

6. (Previously presented) The article of claim 1, wherein said line comprises a limit between said trunk part and said leg parts that is a substantially horizontal line.

7. (Currently amended) A method of manufacturing a boxer short-type article of lingerie having a trunk part and an inseam being made of a loose-fitting textile and leg parts being made of a form-fitting textile comprising circular knitting a bottom welt and a waistband, and knitting the leg part with a yarn having an elasticity higher than the elasticity of the yarn used for knitting the trunk part, said trunk part being knitted from a non-elasticized yarn, wherein said trunk part and said leg

parts are knitted from the same textile material and are
separated by a line passing through the inseam.

8. (Previously presented) The method according to
claim 7, wherein the yarn presenting a higher elasticity is
obtained through plating a non-elastic yarn with an elastic
yarn.
